Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a wheel assembly, classified in class 301, subclass 64.201.
 - II. Claims 16-32, drawn to a vehicle and a swing arm assembly, classified in class 280, subclass 284.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the vehicle, the fork assembly, and the swing arm do not require the particulars of the wheel structure. The subcombination has separate utility because it can be used on other types of fork assemblies, or on other vehicles such as those having an axle and not a fork assembly.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising:

A first embodiment of the wheel assembly as shown in figure 2a.

A second embodiment of the wheel assembly as shown in figure 2b.

A third embodiment of the wheel assembly as shown in figure 2c.

A fourth embodiment of the wheel assembly as shown in figure 2d.

A fifth embodiment of the wheel assembly as shown in figure 2e.

Should Applicant elect the invention of Group I, then Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of the wheel assembly, even if this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Claims 16 and 29 appear to be generic to a plurality of disclosed patentably distinct species comprising:

A first embodiment of the fork/swing arm assembly as shown in figure 3a.

A second embodiment of the fork/swing arm assembly as shown in figure 3b.

Should Applicant elect the invention of Group II, then Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even if this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Eric Robbins on September 26, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Russell D. Stormer whose telephone number is (571) 272-6687. The examiner can normally be reached on Monday through Friday, 9 AM to 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joe Morano can be reached on (571) 272-6684. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
